

## > KAEFER Project Management Qualification Programme

### Short description

The KAEFER PROJECT MANAGEMENT QUALIFICATION PROGRAMME is a tailor-made and systematic training for KAEFER project managers, site supervisors and project team members.

The KAEFER PROJECT MANAGEMENT QUALIFICATION PROGRAMME acknowledges and reflects the fact that top project management skills and a successful execution of projects are crucial for KAEFER to reach strategic objectives and to continue to stand in the forefront of the insulation business.

The programme comprises three qualification levels and is highly customised to the specific needs of the global KAEFER group as well as to local needs and laws. Furthermore, a steering committee is being established consisting of KAEFER and Metier (the training provider Metier Academy International - see link right hand) and KAEFER key personnel. The main objectives of this steering committee are to allocate resources, to monitor the quality of the programme, to ensure the ongoing development and to agree upon necessary adaptations.

### The benefits

Today's and tomorrow's industrial projects inevitably call for a high degree of project management expertise. The KAEFER Project Management Qualification Programme is the perfect tool in response to this challenge! A demonstration of enhanced and vitalised project management professionalism will lead to:

- Project management expertise of our project people according to latest international standards
- Improved customer satisfaction
- Advantages in competition
